

[Dev.P2PXWiki](#)

P2P XWiki

This is a summer of code project. Will use this page as a starting point to write the specification of this software. There is a [Daily Activity Log](#) as well.

User Stories

1. I got my wiki
2. People can find my wiki while I'm there
3. I replicate my wiki to the central server
4. people can fall back and read my wiki on the central server
5. I send my wiki to others
6. People can read my wiki on other P2PXWiki users
7. people can edit my wiki on their own computer while i'm not there
8. I can transfer MASTER rights to some specific nodes (which I know won't go offline) and I can get these MASTER right back easily

All user stories are published [here](#)

Design Choices

Some of the key design issues are discussed [here](#)

There is good discussion going on on registry (name resolution) issues in [jira task](#)

Functional Specifications

Preliminary Functional Specs Are discussed [here](#)

Technical Specifications

Let's talk here about a little tech architecture.

Offline Capabilities

Technical Architecture coming soon.
